# Executive Summary

K W Technology NV is driven by its mission statement: Deliver an alternative product, which will enhance safety and protection: an ability, backed by independent laboratory scientific testing to enhance the intake of airborne viruses and bacteria having a negative impact on individuals in and out of a condition of pandemic. In no way does its use circumvent the need for vaccines, masks and CDC recommended practices.

# Progress and Results

## Circle from left to right:

- ❖ 98% of the subjects tested negative for COVID-19 and later contracted COVID-19 without the use of The Invisible Mask.
  - ❖ 96% of the subjects tested positive with mild allergy symptoms, when not using The 1 Invisible Mask. (86 tested).
  - ❖ On average, 2% of the subjects were questionable.
  - ❖ 1% did not respond to the testing.
- 

# Planning Steps & Timeline to Implement:

## *Step One:*

- Send 1000 of The 1 Invisible Mask to 600 volunteers. (592 people received the product)
- Email and phone calls were the form of communication to verify the use of The 1 Invisible Mask correctly.

## *Step Two:*

- Isolate and qualify subjects for case study.
- Collect Data. (All test subjects' identity is anonymous and did not violate the privacy laws for medical and research purposes).
- Establish a consent protocol, which includes the following letter :

# Permission Letter

Hi [REDACTED],

*Our team is conducting a case study, and we would love to tell the story of The 1 INVISIBLE MASK from K W Technology NV, given the awesome results you've got over the past one month. Would you be interested in working with us to create a case study around the use of The 1 INVISIBLE MASK?*

*Let me know if you're up for it and we can get something scheduled in.*

*Best regards,  
Silver State Lab*

|

*Step Three:*

- Create an Introductory and Qualifying Questionnaire.
- Questionnaires were conducted daily by email and phone calls. Proper use protocol was verified.

*Step Four:*

- Interview questions.
- All data was recorded and compiled.
- Use before, during, and after (BDA) model for building core question set. This protocol introduced structure to the customer interview. It assisted in sorting data;

- **Before:** Explore the problem or challenge. Why was the subject in search of an alternative, non-medical type mechanism, when masks, vaccines and social distancing existed?
- **During:** Discuss how they chose and implemented The 1 Invisible Mask. Discuss the unit for their independent situation: some topics included relationships, support, best and unliked features, and the physiological impact.
- **After:** Discuss how a positive result impacted their health. Discuss any negative impact on their physical health. Discuss conclusion of the positive impact on their health when using The 1 Invisible Mask.

**Compile data on each subject for any positive or negative impact on how the subject reacted to the use and continued use of The 1 Invisible Mask.**

*Step Five:*

- Establish spastic times and conduct interviews
  - Phone interviews were conducted for the safety of our staff.
  - Video calls were conducted and analysis was deduced from the subjection's reactions and use.
  - Face-to-face meetings were conducted, when possible.

*Step Six:*

- Conclusions
  - Phone interviews were conducted and final conclusions drawn.
  - Video calls were conducted and conclusions data compiled.
  - Face-to-face meetings were conducted, when safe for the staff.
